ACQUITTED IN COURT

Judge Severens Decides That an Untaxable Agency for the Sale of Beer May be Formitted.

Judge Severence of the United States court rendered a decision that is of much interest to wholesale dealers in malt liquors and which was a surprise to the revenue officials and district attorney. It was in the case of the gov-ernment against Martin Kull of Ludingtoo who was indicted by the grand jury at its recent session for wholesaling malt liquors without paying the government tax. It appeared in the evidence that Kull had furnished beer to certain dealers and this fact was not disputed by the defendant who admitted that he delivered the beer furnished by a Chicago firm. According to the terms of the contract with the Chicago company Kuil made the sales, delivered the goods and furnished the los house in which to store it before it was delivered. and as a compensation he was to receive all he obtained shove the wholesale price. The government contended that Kull was virtually conducting a wholesale husiness on his own capital, as he was required to advance the purchase price to the company with whom he was doing business, but the defense instated that he was merely acting as agent and the covirt sustained the de-fense. Kull was acquitted and dis-

In striking a jury in the majoractica-case of Callan vs. Whiles some excite-ment was caused by the atterney's ques-tions. Dr. Whalen, the defendant, is a brother of Futher Whalen, the catholic priest. H. J. Felker started the fun by asking each juror if he belonged to the eatholic church. Those who answered affirmatively were fired peremptorily. M. L. Dunham gut back by asking each jurier if he was an A. I'. A., but no one was found who belonged to that organi-ration. After the jury was struck Mr. Dunham moved to dismiss the case on the ground that the declaration did not state facts constituting a cause of action. state facts constituting a cause of action. Judge Grove ruled that it did not, but suspended the entry of order until today at 10 o'clock, when the prosecution will present authorities as to their right to amend. The case was tried twice in justice court and the juries disagreed. The defendant then allowed judgment to be taken against him so he could appeal to the circuit.

COLDBROOK VALLEY SEWER. Prospects Are Favorable for Its Building This Fall.

The Coldbrook valley sever which is being fathered by Alderman Teachout in the common council will, when completed, be the largest sever system in the city. It will form an outlet for a large part of the lifth fourth, third and second wards. It will follow the south branch of Coldbrook creek nearly to Lake arenue, near the city limits. Many of the aldermen are inclined to favor the plan, but the aldermen of the fifth ward oppose it because the part to be built first is in the fifth ward, and there is one place in the fourth ward through which the right of way must be condemned. It is stated by residents of the fifth ward that there will be no opposition to the plan as soon as the right of way is procured. According to the plans snade by the city surveyor the sewer system will be one of the latest double spees instead of one large roughly constructed brick sewer. The brick sewers in which all the storm water and sewage runs in one stream are filled in the spring and fall and are well flushed, but in mideummer there is no storm water and the sewage is sluggish and the

spring and fall and are well flushed, but in midsummer there is no storm water and the sewage is sluggish and the sewer is an elongated cesspeol. The double sewer consists of two pipes of tile smooth and even. One of these carries the storm water and the other the sewage. Being smooth inside there is no chance for clogging and the sewage passes off rapidly at all times.

The committee on sewers is favorable to beginning of work on the sewer this fall. Whether enough votes can be secured for it remains to be seen.

MAKES A QUEER DISCOVERY

The Guy That Held the Hall Street Tower Was Insecurely Fastened-Other Towers.

The committee on lighting, Marshal Lemoin, Superintendent Bettinghouse, Commissioner Bender and the man that cut the limb from a tree on Hall stree! causing the full of an electric light tower, held a meeting last night to con-sider the claim of the Electric Light company for damages. According to the testimony now before the committee it does not appear that the city is at all liable. Mr. Aldrich, the lineman who cut the limb, explained the circumcut the limb, explained the circumstances. He said the limb weighed 110 pounds, but it did not fall more than eight feet and did not strike the guy wire to the tower a heavy blow. He also said the guy wire was not broken, but that it pulled out of its fastenings. Mr. Bettinghouse said he had examined the tower and had taken the city engineer to look it over. They found that the tower was not properly secured to its foundation and that the fastenings of the guy were loose. The wire was not broken. Other towers had been examined since the accident and the guys were found not rigidly secured. The representatives of the company were not present, so the matter was put over until next week.

The committee on parks decided to visit Ball park today to see about moving the green-house and enlarging it.

A special committee appointed to see to the housing of the fountains in Fulton and Crescent parks is having the figures repainted and rebronzed. As soon as the work is done they will be covered, allowing the fresh paint time to set and become hard. stances. He said the limb weighed 410

TO LIGHT WITH ELECTRICITY. Gas Does Not Please the Aldermen in the City Hall

the City Hall.

The city half may be lighted by electricity in the near future as the gas is not giving satisfaction. For some reason there has been no gas in the city hall tower for several nights, consequently the town clock is useless after 6 o'clock in the evening. There will be a resolution introduced Monday night asking for an estimate of the cost of wiring the building and if it does not come too for an estimate of the cost of wiring the building and if it does not come too high the contract will be let. At the time the city will was built the electric light company asked \$8 to bring the wires to the building ready to distribute to various parts of the building. Now it will not cost one-half that sum to wire the whole building. The light given from the gas fixtures has been unsatisfactory to many of the aldermen for a long time and something toward a change will be done soon.

#### "To All Catarrh Sufferers

I Recommend Pe-Ru-Na," Says Mary Massay, Clinton, Texas.

She Speaks From Experience.

The tendency of catarrh of the head is to pass downwards through the bronchial tubes to the lungs. Any one who has had catarrh of the head a year or has had catarrh of the head a year or more linds the disease gradually progressing downwards. In some cases the progress is rapid, and in other cases it is slow; but, some or later, if catarrh is allowed to run, it will go to the lungs and set up the disease known as consumption. It is doubtful if consumption is ever caused by anything except contarrh.

catarrh.

The catarrh usually begins as a cold in the head or throat and is neglected until it becomes chronic, then it begins to dawn on the victim that he has catarrh. Unless he is very "colin indeed he will not rest easy until the catarrh is entirely cured. Thousand pay no attention to it until it is too late.

If Peru-na is used the cold never becomes chronic, and hence catarrh is prevented. But after catarrh has become

comes chronic, and hence catarrh is prevented. But after catarrh has become thoroughly established Pe-ru-na will cure it, but it will take much longer. Even in cases where the catarrh has already attacked the lungs and the symptoms of consumition have shown themselves the Pe-ru-na will curs. A great many cases of the genuine consumption have been used with Pe-ru-na after the patient had been given up to die.

For further particulars send to The Peru-na Drug Manufacturing Company of Columbus, Ohio, for a free copy of "Climatic Diseases," which gives much information on catarrhal diseases.
